1. Base fees have been established using the average number of soil test pits required for the different size categories of livestock facilities. Base fees assume up to 10 test pits.
2. Additional test pits may be required to meet tech guide standards. Fees for additional test pits will be charged at \$95/pit. In circumstances where it is necessary to remobilize to conduct additional test pits that were not originally planned, a \$200 mobilization fee will be charged in addition to the standard \$95 per pit charge.
3. Design, review, and inspection fees apply to facility designs completed by private sector engineers or other public agencies.
4. Fees charged for initial and revised nutrient management plan review will be assessed for all facilities subject to the Chippewa Co. Agricultural Performance Standards, Manure Storage, and Livestock Facility Management Ordinance that were either newly permitted, constructed, or altered after 12/31/18.
5. Late reporting fees will be charged to all active Farmland Preservation agreements, County Cost-share contracts, and Agricultural Performance Standards, Manure Storage, and Livestock Facility Management Ordinance permits in circumstances where annual certification or submittal supporting records is required, and where the material is not received by the established date.
6. An After the Fact Permit Fee is issued when construction starts prior to permit approval. The total applicable fee is doubled (application, site evaluation, review, inspection).
